Payment Module for Connecting with THAIEPAY

Normally, you can connect the system with Oscommerce software by downloading from
http://www.oscommerce.com which provides you many modules to use.

For module of THAIEPAY, it consists of 2 files that are

1. thaiepay.php saved in (includes/languages/english/modules/payment/)

2. thaiepay.php saved in (includes/modules/payment/)

For installation, THAIEPAY has placed the structure of files according to file addresses above.
The structure of files is similar to Oscommerce software's. Users only copy those files and paste in
the same position that we have prepared.

thaiepay.php saved in the folder " /includes/modules/payment/ " is a file used in estimating and
sending parameters and details of THAIEPAY system.

thaiepay.php saved in " /includes/languages/english/modules/payment/ " is a file used in setting
parameters, messages for connecting with THAIEPAY system.

*Notice

- For the installation above, Oscommerce is installed in only English version. If users want to change
it into other languages, you have to put the file in the language you want such as for THAI language,
thaiepay.php saved in /includes/languages**/thai**/modules/payment/.

- Users also set the currency from the file of thaiepay.php saved in folder
"/includes/modules/payment/". The setting has to follow the condition of Oscommerce Configuration.
